Meet the Instructors

Dr. Alayna Pagnani-Gendron, D.C., CACCP

Dr. Pagnani-Gendron is the owner and doctor at HealthPro Family Chiropractic & Acupuncture which has been serving families in the Houston area for over a decade.

Dr. Pagnani-Gendron holds special certificate training in Webster Technique, the Advanced Webster Technique Training, Acupuncture, Myofascial Release and Graston Technique. She completed her C.A.C.C.P., Certified by the Academy Council of Chiropractic Pediatrics. She has specialty training in craniosacral therapy and pre and post frenectomy bodywork. She has lectured around the country on the importance of chiropractic care and how to best serve patients with other specialty providers. Her goal in the treatment of patients is preventative care. She believes in a healthy living lifestyle and treating patients to help them to return to their normal state of health. Dr. Pagnani loves to treat the entire family from birth and beyond and keep everyone healthy.

She loves treating her pregnant patients and helping them to feel their best throughout their pregnancies. She also enjoys treating infants and children at each milestone in their lives and keeping them healthy as they grow.

Dr. Piya Gandhi, DDS

Dr. Gandhi has been practicing dentistry since 2009. She completed her pediatric specialty training at the University of Texas in Houston. She has done extensive training beyond her residency in the diagnosis and treatment of TOTS. Dr. Gandhi screens all of her patients

for oral restrictions and believes in a comprehensive team approach to treatment. Her team currently consists of a SLP, OMT, IBCLC, and pediatric chiropractor.

Introduction

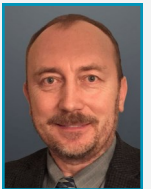

As we learn more about tethered oral tissues and their effects on the body, chiropractors play an important role in helping to identify, treat, and educate families about the implications of TOTs on the body. In the course, you will learn how to identify tethered oral tissue through function and exam, chiropractic techniques pre and post-release, and how to implement this work into your practice. You will also hear from one of the leading frenectomy providers, Dr. Piya Gandhi, about how a frenectomy is done and the importance of chiropractic care to ensure better outcomes for her patients. We will also hear from Dr. Peter Vitruk, creator of the LightScalpel laser, which innovates how frenectomies are performed. This course is designed for all chiropractors to help expand your knowledge in the field of Tethered Oral Tissues and how we can better serve this patient population in our practice.

Learning Objectives

1. How to identify tethered oral tissues
2. Pre and post frenectomy care
3. How to implement TOTs care into your practice

Laser Curriculum

The laser curriculum for this Course has been developed by the American Laser Study Club (ALSC). Laser instructions will be assisted by the guest speaker, Peter Vitruk, PhD, MInstP, CPhys, a laser physicist who founded the American Laser Study Club and LightScalpel Inc.
